

REACH Declaration

The abbreviation REACH means Registration, Evaluation, Authorization and Restriction of Chemicals. The European Union (EU) REACH regulation aims to improve protection of human health as well as the environment from chemical substances.

One of the main elements of REACH is registration of chemical substances. This obliges manufacturers and importers of chemical substances to provide a defined set of information, in the form of a registration dossier, to the Chemicals Agency in Helsinki, Finland. Certain very dangerous substances will require authorization before they can be used and restrictions may be placed on the use of these.

The impact of the REACH directive 2011/65/EU on DKT A/S's business has been evaluated and it has been concluded that it will not be affected by the REACH regulation. This is to the best of our knowledge.
