**Subject: REACH**

Dear customer,

Prysmian Group Baltics AS understands that raw materials used in its production process, are subject to the obligations established by REACH directive (EC Regulation 1907 / 2006).

Whilst concerning the final products of Prysmian Group Baltics AS, REACH classifies them as follows:

- Cables (both energy and telecom): articles not intentionally releasing substances
- Compounds: mixtures (preparations)
- Accessories: articles not intentionally releasing substances
- Optical Fiber: articles not intentionally releasing substances

In the light of REACH requirements, these products – as not being “substances” – are not requested to be registered. Nevertheless, they have to be produced with registered substances.

If you realize that the products we supply to you, do not strictly fall in these 4 categories, please inform us, we will make a specific verification.

At the time being, Prysmian Group Baltics AS is taking the necessary actions to ensure that raw materials purchased are placed on market by their respective suppliers in compliance with their relevant REACH obligations, with the aim to avoid provision disruptions.

In case there is evidence that some of its suppliers are not acting (and / or will not) for a complete REACH compliance, Prysmian Group will take – as long as possible – any action necessary for the continuity of production and sales.

REACH also focuses on a specific group of hazardous substances, named “Substances of Very High Concern” (SVHC), by establishing specific obligations regarding them. A list of VHC Substances called “Candidate Substances” is updated twice per year by ECHA (the European Chemicals Agency). The presence of such substances in final products put on the market, should be notified to the customer if exceeding the 0,1% by product weight.

None of the “Candidate Substances” belonging to the last version of the “Candidate Substances List” updated in June 2022 are supposed to exceed the 0,1% by weight of the articles we supply to you.

Best regards,

Prysmian Group Baltics AS
