

This information is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information they provided. This information is subject to change.

The part numbers that CommScope has identified as EU RoHS compliant have a maximum concentration of 0.1% by weight in homogenous materials for lead, hexavalent chromium, mercury, PBB, PBDE, DEHP, BBP, DBP, DIBP and 0.01% for cadmium, or qualify for an exemption to these limits as defined in the Annexes of Directive 2011/65/EU and 2015/863/EU. Finished electrical and electronic products will be CE marked as required by Directive 2011/65/EU. Components may not be CE marked.

CommScope's information on SVHC's in articles is currently based on the European Chemicals Agency (ECHA) 'Guidance on requirements for substances in articles' (Version: 2, April 2011), applying the 0.1% weight on weight concentration threshold at the finished product level. CommScope is aware of the European Court of Justice ruling of September 10th, 2015 stating that, in case of 'complex articles', the threshold for a SVHC must be applied to both the product as a whole and simultaneously to each of the articles forming part of its composition. To make sure our REACH information stays in line with the changed legal interpretation and industry practices, CommScope is monitoring evaluations of this new ruling and awaits the expected new ECHA guidance on the practical implementation

The REACH declaration statement is related to the substances on the most recent Candidate list. If this statement reports REACH Candidate List substance present in an article > 0.1%, unless specified otherwise, these substances do not pose any risk if the article is used as intended (including disposal). Additional information is not necessary to allow safe use of the article.
